MacNichol Guitars Customer Review

November 13th, 2008 . by Isatinfo2

Many thanks to Rick Spreitzer for the below feedback:

I first ran into Michael Stone while shopping for a dealer with Composite Acoustics in stock. At the time, I wanted to try the Cargo and Michael was very helpful and responsive on several fronts. He freely offered his time and expertise and ultimately it led me to a great guitar purchase: a CA 7iM-CE with the LR Baggs I-Mix system. This guitar has quickly become a mainstay for live gigging and I use it as a companion to my tried and true CA Performer (also with the I-Mix system). The 7-series offers me the right combination of plug and play constancy (between it and the Performer) and it's own tonal uniqueness (due to the more vibrant top with it's unique integrated bracing as well as the off-set sound hole).

But let me back up a step here: Michael's time, expertise and fair dealing landed me more than a great guitar. He also has given me an ally and sounding board in the unique world of carbon guitars. He clearly knows his stuff. He is generous and on point with his information. I'm grateful for the relationship with Michael Stone and MacNichol Guitars and Mandolins and don't hesitate to steer folks his way.

If there are fair and decent forces to the universe, more folks will be singing a similar tune about Michael and MacNichol.
